Daily Field Activity Log

DFAL

The Daily Field Activity Log, or DFAL menu is where the user can select to create a new DFAL, select an existing DFAL record, view all existing DFAL records or go to table maintenance.

To create a new DFAL, begin by entering the date for the record as an eight digit number in the format YYYYMMDD. Tab to the Badge Number field and enter the badge number. The system uses the date and badge number as the key to the record. These are saved in a string in the order of badge number followed by date. This assures that in a multi-user environment, no two records will have identical record numbers. In addition, this system makes locating an existing record as easy and keying in the badge number followed by the date.

The screenshot shows a software interface with a dark blue background. At the top, a blue banner contains the text "Public Safety Computer Services". On the left side, a blue box with a black border contains the text "Daily Field Activity Log". On the right side, there is a form area with a light blue background. It includes a "Date:" label followed by a text input field containing "12/4/2007" and a "Set" button. Below this is a "Badge Number:" label followed by an empty text input field. At the bottom of the form area, there are two buttons: "Open New DFAL for Data Entry" and "Close".
